

DBA - The Denver Burglar Alarm

DBA is an Acoustic duo that focuses on a shared love and passion for making good music. Although they maintain a professional relationship when it comes to playing and writing, they are family, and being able to play music with someone who knows and understands you as a person has been a blessing. The two members of DBA are Mason (vocals, guitar, banjo, drums) and Kirk (vocals, guitar, mandolin, bass, and keyboards). DBA started playing together in 2014 after years of working on musical projects separately. The local scene started to listen and accept DBA as they went from playing open mics to bigger stages at various breweries, wineries and restaurant venues that offer live music. They enjoy playing as an acoustic (and sometimes electrified) duo, and often loop percussion to deliver a full band sound. Always on the lookout for new ways to perfect their craft, they prioritize the vocal harmonies and perform and record songs for that purpose. The importance of the familial musical/ harmonic bond cannot be overstated. Their musical style continues to evolve, which has led to experimentation with many different types of music and instruments. In 2018, they released their self-titled E.P. of original music, and played more than 40 dates in Colorado and Texas. In 2019 they plan on new adventures with festivals, more original recordings and a mini-tour of the Midwest, all while working to become a household name in the growing Colorado music scene. Whether it's Reggae, Indie, Americana, Power Pop, or Acoustic Folk Rock, their range will give audience members something to appreciate.
